## 8. Lucky Number

Program Name: Lucky.java Input File: none

Xavier needs to make a stencil to use to paint his lucky number on his book covers. You are to write a program that will create this stencil for him.

## Input

There is no input for this problem.

## **Output**

Print this stencil exactly as it appears below.

## **Example Input File**

There is no input for this problem.

| Example Output to Screen                |
|---|
| *******                                 |
| *                                       |
| ******* ** ** * * * * * * * * * * * * * |
| ************                            |
| ***********                             |
| *******                                 |
| ******                                  |
| ******                                  |
| ******                                  |
| *******                                 |
| *******                                 |
| *******                                 |
| ******                                  |
| ******                                  |
| ******                                  |
| *****                                   |
| *****                                   |
