## 6. Octo-man

Program Name: Octo.java Input File: none

The famous crusader Octo-man keeps watch over illegal number patterns – especially numbers containing the digit eight. You are to write a program that will create this logo for his super-crusader shirt.

## Input

No input.

## Output

Print this logo exactly as it appears below.

## **Example Input File**

There is no input for this problem.

Example	Output	to Screen
